Welcome to the Centregreat Group

Centregreat is a well-established, high quality, infrastructure services provider, proud to serve Clients across a number of disciplines.

We are a privately-owned company headquartered in South Wales and have been supporting critical infrastructure since the 1970s. Our success is built on strong relationships and centred around great service. Our flexible, 'work with', approach to contracts and projects enables us to support our Clients effectively and provide the best solution to each and every scheme we work on.

Working across a number of sectors, we provide installation, maintenance, refurbishment and optimisation services:

- Public lighting;
- Traffic signals/telematics;
- Bridges & structures;
- Rail infrastructure;
- EA flood defense gates & tidal gates;
- Piers & jetties (structures);
- Mechanical & Electrical;
- Civil engineering & construction;
- Smart (roadside) technology.

Centregreat places a significant emphasis on the quality of its service delivery, holding all necessary accreditations including Quality OHSAS 18001, ISO 9001 and ISO 14001 and Investors In People, as well as having affiliations with a number of leading industry bodies across the rail and highways sectors.

We provide modern, efficient plant and equipment along with experienced project managers and site operatives who recognise the need to provide a high-quality service underpinned by a strong health and safety culture.

The Centregreat Group operates from various locations across South and North Wales, and Scotland, delivering projects for public and private sector Clients across the UK.

Public Lighting

At Centregreat Lighting we recognise the potential of the 'humble' streetlight and are well positioned to deliver wider solutions. We have a wealth of experience delivering across public lighting infrastructure; undertaking all works associated with highway lighting, new developments and wider electrical systems (including parking and EV charging infrastructure).

We have been operating within the public lighting industry for over 40 years, and successfully install, repair and maintain public lighting (including management systems), signage and other street furniture for local authorities, highway agencies, civil engineering companies, housing developers, airports and private Clients. Our ongoing range of contracts crosses the spectrum of lighting works; from the provision and installation of road lighting and signs for major highway maintenance contracts to small individual projects and maintenance works for individual housing or tenant associations.

Services:

- Public/street lighting;
- Groundworks;
- Trenchless technology;
- Permanent reinstatements;
- High Voltage & Low Voltage jointing;
- High Voltage & Low Voltage cabling;
- Traffic signs – illuminated and non-Lit;
- Solar power energy;
- Festive lighting;
- Underwater lighting;
- Flood lighting;
- Fabricating & welding;
- Lighting design & solutions;
- Energy surveys;
- EV charging infrastructure;
- NERS accredited to carry out jointing on DNO networks;
- Non-destructive testing of street lighting columns above and below ground level with no excavations required.

Traffic Signals / Telematics

Centregreat has been installing and maintaining traffic signals and associated technology for public and private sector Clients since 2012 and is the largest, privately owned, traffic signal service provider based in Wales. We have the in-house capability to deliver a full installation service including civils, traffic management and slot cutting.

Our collaborative approach means we work closely with our Clients to fully understand their needs and success criteria for any given project. As we are supplier agnostic, we also look to source the best technology innovation for each site depending on the requirements and limitations.

Services:

- Design & consultancy;
- Technical services;
- Installation & commissioning;
- Maintenance including emergency call-out / 24-7 standby;
- Civil engineering;
- Traffic Management;
- Road markings & studs;
- Slot cutting;
- Fibre networks;
- VMS/VAS.

Existing Clients include most major civil companies, consultants, local and national government agencies.

Engineering

Centregreat Engineering specialise in the delivery of critical infrastructure; road and rail bridge structures, piers and jetties.

We are well versed in the design management and assurance standards that are required for projects of all sizes. With a team of highly skilled and experienced engineers, we specialise in the manufacture and installation of new structures as well as the refurbishment and strengthening of existing structures. Our Chief Engineer is a Civil and Chartered Structural Engineer, with over 35 years' design experience in this field and all site personnel hold PTS cards for working in a rail environment.

Extensive workshops (3500m²) including shot blast and paint facilities, supported by our substantial workforce, enables us to provide a turnkey solution or alternatively individual services (manufacture, painting or installation).

Existing Clients include most major civil companies, consultants, local and national government agencies. We believe in a collaborative approach and are proud of our successful track record in project delivery.

Services:

- Grit blasting & surface preparation;
- Steel fabrication;
- Priming & painting;
- Bridge deck fabrication;
- Strengthening & repair.

Construction

Centregreat undertakes the construction of building, civil engineering, highways and urban regeneration projects. We have a strong reputation earned through a 'work with' approach to delivering high quality projects within the constraints of time and budget. More importantly, we understand that the ultimate Client is the local resident, visitor and/or road user, as such we are always mindful of local and wider communities in addition to ensuring the best outcome for all stakeholders.

With our sister company, ERH, we have a full range of services and skills to meet the requirements of a broad range of Clients.

Services:

- Footway & carriageway construction, maintenance & renewal;
- Car park construction;
- Gates, railings & fencing;
- Brick & blockwork walls/retaining walls;
- Kerbs, paving & steps;
- Drainage works;
- Street lighting & electrical works including ducting;
- Traffic/pedestrian management;
- Landscaping;
- Bridge construction & maintenance;
- Telematics installations;
- Public realm, environmental improvement;
- Traffic calming & safe routes in communities' schemes.

In addition to the physical works, we also pride ourselves on strong stakeholder liaison and tailor this to the individual project. Communication channels include; letter drops, community meetings, drop-in sessions, face to face meetings, provision of a dedicated public liaison officer, presentations and social media (Twitter).

Rail

Centregreat Rail is an award-winning rail infrastructure service provider. With extensive experience in Mechanical & Electrical, Civil Engineering and rail infrastructure support, our team of professionals prides itself on delivering practical, flexible and innovative solutions that challenge the status quo.

We have operated in the rail industry since 2009 on a variety of upgrade, refurbishment and maintenance projects and were awarded the Network Rail Principle Contractors Licence in 2015. Our fully integrated management systems are externally awarded and audited to OHSAS 18001, ISO 9001 and ISO 14001. Additional accreditations include RISQS, CHAS and NICEIC.

Services:

Infrastructure engineering

- Civils (steps, walls, barriers/fencing, paving...);
- Structural steelwork including gantries;
- Station platform works including canopies;
- Blast cleaning & painting.

Electrical

- Design, supply, install, test & commission;
- Computer-aided Design (CAD) & red-line drawings;
- Design, supply & fit Cable Management Systems (CMS).

Mechanical

- Fabrication, installation & maintenance;
- Hydraulic & pneumatic control systems;
- Conveyor installations;
- Pumping schemes;
- Personnel hoisting systems.
